

ASTRO PAK®

ROUGE ALERT™ Passivation Monitor

Since 1959, Astro Pak Corporation has been the global leader in on-site precision cleaning and passivation of high-purity gas and fluid systems. Now we have applied those four decades of experience into a product that will help YOU better manage your critical systems...

The **"New and Improved" Rouge Alert™ passivation monitor** is an online instrument that is specifically designed for high purity water systems. This instrument measures the rouging rate of stainless steel piping on a real-time basis. By integrating those measurements over time, rouge depth can be quantified and maintenance programs can be accurately scheduled. Additionally, the transmitter device now comes in an explosion proof casing allowing for installation in any environment.

PRODUCT FEATURES

- Measures the Rate of Rouging in Microns/Month
- Records Rouge Accumulation in Microns
- Provides Maintenance Planning Data
- Water Quality Alarm
- Built-In PC Interface
- Explosion Proof Transmitter
- Reduces Downtime
- Eliminates Unnecessary Service

Take the guess work out of knowing when to passivate...
